I graduated biologist with bioinformatics specialization and I am forester technician so I am interested in plant physiology and medicinal plants. I have done my thesis at Faculty of Medical Science. Title of my thesis is Test of bacterium strains through capillary electrophoresis and micellary electrokinetic chromatography. As biologist student I have had some laboratory duties about anatomy, biochemistry, microbiology, molecular biology, physiology. I have used EDTA for sample preparation. I have adjusted the pH many times as need proper researching environment for testing bacterium strains. I have used some type of pipettes as routine laboratory job. The electrophoretic buffers have specific pH and most of the bacterium strains too. The characterizations of bacterium strains have required some special equipments including but not limited Capillary Electrophoresis System, eppendorf pipettes and eppendorf centrifuges. I have done the records integration through BioFocus Integrator 5.20 version. I have passed my biometrics exams in connection with biological mathematics. I have had general cleaning duties if I finished my job at laboratory. I completed an investment training course at Savi Trading in office environment in United Kingdom. I used some currency pair trading tools for example resistant and support level, trend lines, Exponential Moving Average, Simple Moving Average, Moving Average Convergence Divergence. I have learnt about risk reward and trading psychology and trading strategy. As currency trader I always use stop loss order and limit order if I recognize an entry point to trading. I am keen, conscientious, punctual, hard-working and reliable person and work well either part of team or alone. I am good timekeeper and enjoy meeting people. My aim is to find employment in an environment with high standards and productivity. I have always enjoyed working with people. I have experience using web based chat. As member of Norton Community the internet security is big part of my life. I can use all graphical web browsers and e-mail clients and messengers and many computer softwares.
